---

Are there any legal issues I need to be aware of for the Grishams observation of the sampling?

Just got a call from Curt Grisham. He is interested in the status of the field work, the schedule, and if he or his dad could observe some of the sampling. I told him we had recently approved the sampling plans, but I was not sure of what the field schedule was. If you can get me something back today, then I can send along to Curt. Otherwise I am out of the office for a while, so please send along directly to Curt. Thanks.
